

# BMA KIDSPACE AT HOME!

## Make a drum with Pam!

Ready to get a bit louder? Artist Pam Hutley was inspired by her love of the african drumming and has created some fun drums using recycled objects in her home.

### 1 Collect required materials:

- A plastic cup, not too soft so it won't collapse.
- Paper bag to fit over the cup. I used a lunch bag.
- About 5 cm wide masking tape
- Scissors
- Felt pens or crayons

### 2

Place the paper bag over the cup, hold as firmly as possible so the paper is tight, then wind a length of the tape around it. Best to measure and cut the tape first!

### 3

Decorate with whatever is on hand, add a little wool or ribbon embellishment over the tape and join the band. All done! By holding the base of the cup and using your other hand/fingers to tap out a tune!
